DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, 21, and 22, drawn to a system for draining fluid from a layered soil profile, classified in class 405, subclass 50.
- II. Claims 12-20, drawn to a method of draining fluid from a layered soil profile, classified in class 73, subclass 32R.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the system for draining fluid from a layered soil profile, as claimed, can be used in a materially different process of using that product such as a process which does not include the step of separating the layers of the soil profile.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Attorney Courtney Miller on April 25, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3673

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
